

Climate Emergency Policy

Bisley-with-Lypiatt Parish Council has declared a climate emergency. The likely climate change effect will be an integral consideration in all decisions and actions we take. The Council will make all practicable efforts to reduce carbon emissions from its own activities to net zero as soon as practically possible. In addition, we will do all we can to encourage and help residents and businesses in the parish to work towards the goal of carbon zero by 2030, in accordance with SDC's 2030 strategy.
