

# EASTCOMBE RECREATION GROUND

The development of Eastcombe Recreation Ground looks to build on and enhance what is currently in place, to create a fun and engaging new play space for children of all ages to enjoy.

New natural style timber equipment, in keeping with the park's natural aesthetic, will be arranged to allow children to run, jump and tumble along play trails. Additional bench seating will provide places to sit and socialise.

Where possible existing play equipment will be retained and reused, whilst the existing football pitch will be moved slightly to the south to provide space for the development.

A combination of new trees, small areas of wildflower meadow and ecological interventions such as bug hotels, will help to boost biodiversity and ecology within the park. The large existing trees along the edge of the park will be retained to ensure the green leafy feel is maintained and protected.

The development and enhancement of the park will help to cement it as a key community asset and one to be enjoyed for many years to come.

Enclosed lawns & play areas for children to gather

Enhanced planting with ecological interventions

Playspace for younger residents

Enhance and retain existing green assets within the site

A safe, well-vegetated play space for all ages that which encourages play, wellbeing and a sense of community

STILT CLUSTER

SLIDE AND PLATFORM

CLIMBING STACK
